EnetCollect WG3/WG4 Meeting, 27-29 November 2019

University of Trnava, Slovakia

(Venue location: The main building, Hornopotočná 23)

EnetCollect is a large international network funded as a COST Action (CA16105) currently involving more than hundred stakeholders from Europe and outside. It aims at unlocking a crowdsourcing potential available for all languages and at triggering an innovation breakthrough to produce language learning material and language-related datasets using NLP (natural-language processing) language resources. Join us here: https://enetcollect.eurac.edu/joining-enetcollect/.

Hands-on workshop: During this two-and-a-half-day workshop, participants will learn how to construct and deploy their own LARA-content and contribute to the development of an open source platform. Participants are kindly required to bring their own computers.
